Ai-Healing in QA Automation

How Webomates Helped Talage
Do More with Less

June 4, 2024

WEBINAR

ABOUT WEBINAR

Talage, a leading Insurance Tech software company, successfully managed to maintain its QA standards and development pace with the limited resources of a fast-growing startup.

CTO, Brian Pullin, leveraged Webomates AI-automation Testing as a Service be the key to sustaining progress without adding headcount.

Today we will get a behind-the-scenes look at how Talage's engineering team maintained a high level of quality and delivery and Talage found that Webomates acts as a force multiplier

AiHealing™ – Webo.ai's Super Power

Test Automation Maintenance is a thankless job

- **80%** of the effort in maintenance is AFTER the automation is created

- Automation is never up-to-date, release can be **delayed** for days or weeks

- Test Maintenance can be **VERY** expensive, or worse, is passed on to your customers to find bugs escaped into production

Keep test cases and test scripts updated with AiHealing™

- Test cases and test scripts **created** for you

- Test cases and test scripts **maintained** for you

AiHealing™

➤ **Script Issues**
Locator, timeout, test data, etc.

➤ **Modified Features**
Test case and script updates

➤ **Added Features**
Test case and script added

Get AiHealed Test cases within 8-24 Hours of the Test Cycle with guaranteed SLA

Webomates' Role

Daily smoke tests and biweekly AiHealing

Uncovering Issues that may otherwise go unnoticed

Reduced Management Overhead

Enabling the QA team to maintain High Quality

Webomates' Results

Setup - 2022

- 300 Test Cases, 300 automations,
- Customer review and approval was
- Onboard 3 weeks/ 2mos Operationalize

AiHealing

- 529 - Total
- 354- Healed 5 times
- 46 - healed 2-4 times
- 129 - Healed Once

Executions

Full – 48

Overnight – 24

Smoke -173

Bugs Detected-

84 Bugs Accepted

11 Priority One Defects

Webomates' Impact

Setup

Webomates - 10hrs over 3 weeks / 2 Mos

Vs.

Industry Avg - 130 Person Days

AiHealing

Zero Hours

Vs.

105 Person Days

Executions – 246 Total "Runs"

Full – 48 Vs 720 Person Days

Overnight – 24 Vs. 108 Person Days

Smoke -173 Vs. 43 Person Days

Prioritize Teams Efforts

Faster Release

Reduced Defect Leakage
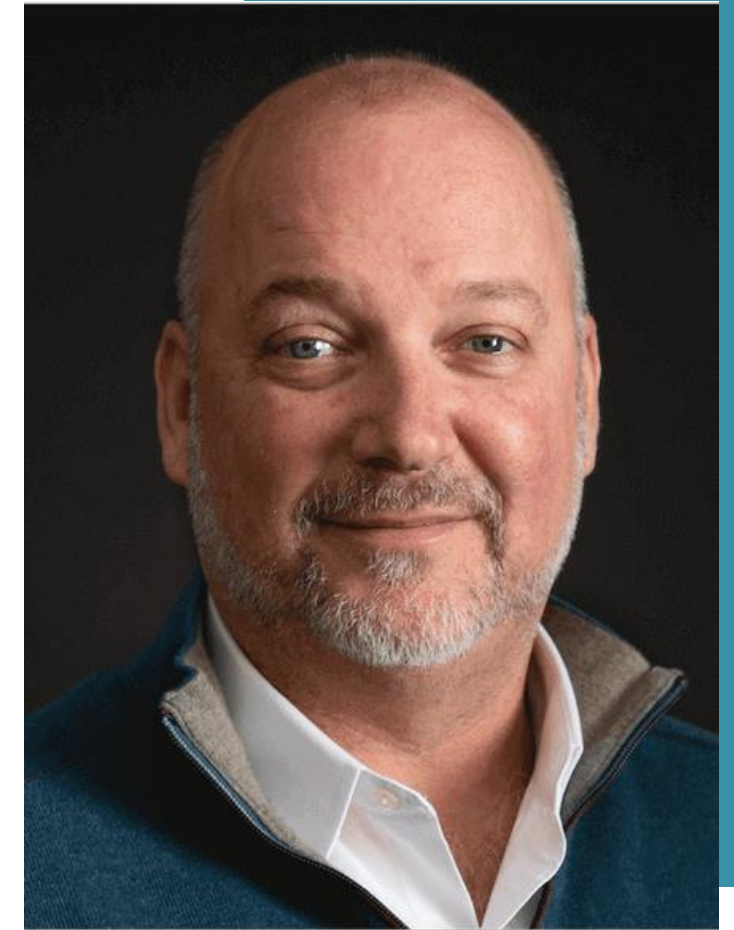

Better Customer Experience
